1. Go to the above web site
2. Type in your name (just your first name or nickname)
3. Be patient and wait a second (watch till the skier gets to the end of the run).

Makes you understand why NASA was arm-twisted into a risky shuttle mission to extend the life of the orbiting Hubble telescope.

The object of the game is to move the red block around without getting hit by the blue blocks or touching the black walls. If you can go longer than 18 seconds you are phenomenal. It's been said that the US Air Force uses this for fighter pilots. They are expected to go for at least 2 minutes.

Give it a try but be careful . . . it is addictive! The URL is <http://tinyurl.com/56t9u>

Pizza in 2010

Want to see how to order a pizza in 2010? Click the link and see Turn up the volume. Listen closely and watch the screen and pointer carefully. You may laugh and this is funny, but it could happen. The technology is already there.
